SUMMARY

Graduated from Informatics Engineering, Indraprasta PGRI University. After graduating, I joined the Immersive Quality Assurance Engineer Program at Alterra Academy because I wanted to grow and keep learning. I am excited to start work as a QA Engineer because it requires accuracy, ability to think and make sure for software everything is well. I learned about the fundamentals of QA Engineer to improve my skills in improving software performance. In this training, I learned to do manual testing and automated testing for web applications, mobile applications and APIs using Java, Gherkin, Maven, Serenity BDD, Selenium and Rest Assured. I also learned about GitHub collaboration to work on project development and Performance Testing using JMeter.

TECHNICAL SKILLS

- Languages : Java
- Technologies : Netbeans IDE, IntelliJ IDEA, Postman, Serenity BDD, Cucumber, Selenium, Rest Assured, MySQL, Android Studio, Appium, JMeter.
- Other : Algorithms, Data Flow, Testing Documentation, Problem Solving.

PROJECTS

- **BengCall:** This project collaborates with four-person on BengCall software that is very useful when someone needs a mechanic to fix their motorbike quickly and not wait too long. To ensure that BengCall works properly and meets the requirements, we as Quality Engineers carry out a kind of test to make sure everything is fine. In this project, I am in charge of making testing documentation, manual testing using Postman, automation web using Serenity BDD with Selenium and API automation using Serenity BDD with Rest Assured. [Github](#).
- **JsonPlaceholder:** This project collaborates with three-person on testing JSONplaceholder API on several endpoints, provided using several HTTP methods including GET, POST, PUT and DELETE. In the manual testing using Postman and automation testing using Serenity BDD with Rest Assured. In writing automation testing scripts using Java programming language. [Github](#).
- **Cashier Application:** This is the final project during semester-eight in Indraprasta PGRI University. This is a sales application project, aimed to simplify the transaction process for sellers and buyers to make transactions. In designing this application, first create DFD and ERD structures. Using technology tools Netbeans IDE for screen design and code design structure. programming language used Java and for databases used MySQL. [Github](#).
- Alongside the project above. See the source on [Github](#).

WORK EXPERIENCE

Smart Bimb

Admin

July 2017 - May 2018

West Java

- Processing finance data using Microsoft Office Excel.

PT. Akura Bina Citra

Admin Trainee Intern

October 2015 - January 2016

West Java

- Processing data using Microsoft Office Excel.
- Do compiling documents, accordingly number invoice.

EDUCATION

INDRAPRASTA PGRI UNIVERSITY

Bachelor of Computer, Informatics Engineering

August 2018 - September 2022

South Jakarta

- 8/8 semesters, 3.60/4.00 GPA cumulative.
- Thesis: Java based sales information system.

ALTERRA ACADEMY

Immersive Program, Quality Assurance Engineer

September 2022 - December 2022

- Immersive Program Quality Engineer is an intensive 3 months training to ensure the quality of software can function optimally.
- Course: Agile Methodologies, Testing Documentation, Git, Github, Gitflow, Basic Programming, TestRail, WEB Automation, Serenity BDD, Selenium, API Automation, Rest Assured, Mobile Automation, Load Testing.
- Capstone Project: Automation Testing on software BengCall using Serenity BDD, Selenium and Rest Assured.

SMK MANDALAHAYU BEKASI

Software Engineering

July 2014 - May 2017

West Java

- Competence Test: Desktop-based cooperative using technology tools Visual Basic .NET and MySQL databases.

CERTIFICATIONS

- API Test Automation with Postman ([Issued by TestAutomationU December 2022](#)).
- Mobile Automation with Appium in Java ([Issued by TestAutomationU December 2022](#)).
- Cucumber with Java ([Issued by TestAutomationU December 2022](#)).
- Software Testing Tutorial ([Issued by Great Learning Academy December 2022](#)).
- Java (Basic) ([Issued by HackerRank December 2022](#)).
- MySQL (Basic) ([Issued by HackerRank December 2022](#)).

LANGUAGE

- Bahasa (Native)
- English (Limited Working Proficiency)

INTERESTS

- Playing strategy games and assembling legos.
- Likes and arranges things in an orderly and neat manner.
- Listening and watching music videos.
